(If you do not understand the label, find someone to explain it to you in detail.)

SHAKE WELL BEFORE USING

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals *Causes Skin Irritations *Harmful if Swallowed *Prolonged or Frequent Repeated Skin Contact May Cause Allergic Reactions

DIRECTIONS FOR USE

Read all directions for use carefully.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Container Reuse: Nonrefillable container. Do not refill or reuse this container. Triple rinse or pressure rinse promptly after emptying.

FIRST AID

If on skin: Rinse skin immediately with water. If swallowed: Immediately call a poison control center or doctor.

NOTICE

Read entire label. Use only according to label. Before using this product read Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies elsewhere on this label. If terms are unacceptable, return at once unopened.

GENERAL INFORMATION

N-Saver D is formulated to use with urea, UAN solutions and animal waste. N-Saver D is intended to be used as a supplement to a regular fertilizer program and may not, by itself, provide all nutrients required by crops and other plants. UREA: N-Saver D may be used to treat dry urea prior to application to the field. Application of urea to the field is recommended soon after treatment to provide the best results. In high temperatures and humidity conditions urea will become wet, urea treated with N-Saver D may result in the fertilizer material becoming sticky. Should these conditions occur during mixing and application timing, a small amount of drying agent may be added to the blending process. When other fertilizer materials are added to the blend such as phosphate or potash, a drying agent will not be needed.

LIQUID FERTILIZERS: N-Saver D may be mixed with liquid fertilizers such as aqua ammonia or other liquid Ammoniacal urea nitrogen fertilizers. Liquid fertilizers containing high levels of phosphate should not be used with N-Saver D. If pesticides are added to the tank mix in conjunction with liquid fertilizers a compatibility jar test should be performed prior to large scale application to the field.

LIQUID MANURES: N-Saver D may be mixed with liquid animal manures, rate per acre is based on volume of liquid material applied. N-Saver D may be applied to slurry pit or through an injection system as material is loaded into applicator.

APPLICATION RATES

UREA: Use N-Saver D at the rate of 4 quarts (128 oz) per ton of urea treated in the blender.

LIQUID FERTILIZERS: Use N-Saver D at the rate of 2 quarts (64 oz) per ton of liquid nitrogen fertilizer.

LIQUID MANURES: 5000 gallons and above use 24 oz of N-Saver D per acre. Below 5000 gallons use 18 oz per acre.

TERMS AND CONDITIONS OF USE

If terms of the Warranty Disclaimer Inherent Risks of Use and Limitations of Remedies are not acceptable, returned unopened package at once to seller for a full refund of purchase price paid. Otherwise, use by the buyer or any other user constituent's acceptance of the terms under Warranty Disclaimer, Inherent Risks of Use and Limitations of Remedies.

WARRANTY DISCLAIMER

Willowood USA warrants this product conforms to the chemical description on the label and is reasonably fit for the purpose stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. TO THE EXTENT PERMITTED BY LAW, Willowood USA MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.
